PROFESSIONAL SUMMARY

Freelance full-stack developer and digital designer with professional experience since 2020, specializing in building modern web applications, business management systems, and desktop applications. Experienced across the full development lifecycle, from requirements and interface development to backend architecture, database design, deployment, and maintenance.

Hands-on experience building systems for businesses and organizations, including inventory management, customer and vehicle records, invoicing, sales, shipment tracking, expenses, revenue, reporting, school administration, and other operational workflows. Also experienced in logo and visual identity design.

Skilled in modern JavaScript frameworks, state management with Redux Toolkit, and cloud-based backends using Firebase. Comfortable delivering scalable, maintainable code and collaborating directly with clients to translate business needs into functional software.

EXPERIENCE

Freelance Full Stack Developer & Digital Designer

2020 – Present

Independent / Client Projects

- Design and develop full-stack web applications, websites, desktop applications, and business management systems for clients.
- Build responsive and interactive interfaces using React, Next.js, TypeScript, JavaScript, HTML/CSS, and Tailwind CSS.
- Manage application state with Redux Toolkit for predictable and maintainable data flow across complex UI.
- Develop backend services and REST APIs using Node.js and Express.js.
- Design and integrate databases using PostgreSQL, MongoDB, SQLite, Firebase, and Prisma.
- Use Firebase for authentication, real-time database, and cloud-hosted backend services when appropriate.
- Develop business systems covering inventory, sales, invoicing, customer management, expenses, revenue, shipment records, and reporting.
- Build desktop applications using Electron and React.
- Deploy web applications using Vercel and manage source code with Git.
- Create logos and digital design assets using Photoshop and Illustrator.

TECHNICAL SKILLS

FRONTEND DEVELOPMENT

React · Next.js · TypeScript · JavaScript · HTML/CSS · Tailwind CSS

STATE MANAGEMENT

Redux Toolkit · React Redux · Context API

BACKEND DEVELOPMENT

Node.js · Express.js · REST APIs · Nest.js

DATABASES & CLOUD

PostgreSQL · Prisma · MongoDB · SQLite · Firebase

DESKTOP & TOOLS

Electron · Git · Vercel

DESIGN

Adobe Photoshop · Logo Design · Adobe Illustrator

PROFESSIONAL APPROACH

I focus on understanding client requirements deeply, then designing clean, scalable solutions that are easy to maintain and extend. Whether working on a small business tool or a multi-user platform, I prioritize clear communication, reliable delivery, and code quality.

I continuously update my skills with modern tools and frameworks, including Redux Toolkit for state management and Firebase for real-time and cloud-based features, to ensure that the software I deliver is both current and dependable.

LANGUAGES & INTERESTS

◆ Dari / Persian (Native) ◆ English (Professional) ◆ Urdu (Conversational) ◆ Open-source & side projects ◆ UI/UX exploration ◆ Business automation

SELECTED PROJECTS

Central Tyres

NEXT.JS · TAILWIND · POSTGRESQL · PRISMA

Tyre Shop & Garage Management Platform — A full-stack business management application developed for a tyre shop and vehicle garage, providing an administrative system for managing day-to-day operations.

- Customer management
- Customer and vehicle records
- Product and tyre management
- Inventory management & stock alerts
- Sales records & invoice management
- Admin dashboard
- Expense and revenue tracking

BBCL Business Management System

REACT · ELECTRON · CSS

Desktop Management Application — Developed for Baset Baes Company Limited (BBCL), a China-based manufacturer and global exporter of electric machinery including water pumps, generators, and related products.

- Inventory management
- Shipment records
- Expense management
- Revenue tracking
- Business reporting
- Desktop-based management workflows

Project status: Completed in 2025. Current operational status is unknown.

Hadia Moarif High School SMIS

MERN STACK · REACT · REDUX

School Management & Information System — A web-based School Management and Information System developed for Hadia Moarif High School to streamline student and school administration.

- Student information management
- Attendance management
- Marks and grades
- Assignment management
- Administrative workflows
- School records management

Project completed but subsequently discontinued following the closure of the school.

EDUCATION

Bachelor of Science in Computer Science

COMSATS University Islamabad — Lahore Campus

Graduated 2020

Relevant foundation in computer science, software development, programming, databases, and computer systems.

Arts — 5 Semesters

Kabul University

Completed five semesters of study in the Arts program.

ADDITIONAL INFORMATION

- ◆ Full-stack web development
- ◆ Business management software
- ◆ Desktop application development
- ◆ Database-driven applications
- ◆ Administrative dashboards
- ◆ Inventory and sales systems
- ◆ UI implementation
- ◆ Logo and visual identity design
- ◆ Redux Toolkit state management
- ◆ Firebase integration
